

seca 213I

Mobile stadiometer
with integrated level

optimized

- Equipped with level for correct positioning.
- Simple and easy to set up – no wall fastening necessary.
- Large floor plate ensures stability.
- Result clearly visible while measuring.
- Convenient and easy to transport.

seca 213I:

The convenient mobile method of measuring height.

The stadiometer seca 213I is especially suitable for mobile use, e.g. for measuring children and teenagers in the course of medical examinations in schools, for use by carers and health workers on the move. But it is also ideal for doctor's surgeries and hospitals specialising in child and adolescent medicine. Furthermore, the seca 213I is suitable for measuring patients lying down. Once taken apart, the stadiometer is easy to transport anywhere. Whereas, the level ensures always the correct positioning and horizontal stand.

Simple and quick to set up – no wall fastening required.

The measuring rod seca 213I which can be dismantled into several pieces can be set up easily and quickly. It is mounted on the floor plate in no time at all. Further assembly, e.g. by means of a wall fastening, is no longer necessary.

Flexible positioning due to large floor plate.

The stadiometer seca 213I can be used anywhere because the large floor plate provides the necessary stability. The stadiometer seca 213I is therefore the ideal piece of equipment for all those who require reliable measuring instruments at frequently changing locations.

Precise reading of results.

Adjusting the smooth-running measuring slide is extremely easy due to the large head plate. A further helpful detail is that, as the scale is printed along the side of the measuring rod, it is easy to read off the result while measuring, thus guaranteeing precise results – up to a height of 205 cm.

Convenient and easy to transport.

Practical: the stadiometer seca 213I is easy to take anywhere not only because it can be dismantled in no time at all but also because it has a practical, integrated handle.

Level for precise and reliable measurements.

Integrated handle and secure catches on all individual parts for transport ease.

Carry case 412 for convenient transport.

Large platform for stability.
